Dr. L. D. Godshall came in from Los Angeles this morning.

W. B. Ridenour, of Hackberry is visiting in Pasadena.

Henry Lovin is building another cottage on his lots on East Beale street.

L. Jane, a member of the Yucca Mercantile company, was a Kingman visitor this week.

Some of the Kingman firms are now using the new phone line to Goldroad. It is said to be working fine.

Joe Prisk, of the Home Pastime mine, is in Los Angeles, where his mother is reported to be very ill.

Immigration Commissioner J. H. Rosenberg has gone into the country to look over some mining property.

Mrs. Mary E. Cohenour is building a handsome cottage on her Pleasant View tract, north of Kingman town-site.

Mrs. E. F. Thompson and children have gone to Los Angeles and beach resorts, where they will enjoy a few months outing.

A bad wreck on the Santa Fe between Holbrook and Gallup delayed west bound traffic about 48 hours Tuesday and Wednesday this week. A big freight engine went through a bridge piling up many cars and putting the locomotive in condition for the scrap pile. The fireman and head brakeman of the train were killed and the engineer badly injured.

Sam Meyers, of Chloride, was brought over from that place a few days ago and lodged in jail on a charge of selling liquor to Indians. He had a hearing before U. S. Commissioner Smith and held to the U. S. grand jury in bonds of 500\$, which he has so far failed to give. Meyers is an old timer in the county and when sober is one of its good citizens, but when drinking will do anything for liquor.

During the high water in the Colorado river a gang of railroad men were sent out to save ties and rails on one of the side tracks near Needles. While at work breaking up the track more than one hundred feet of rails, with the ties still in place were caved off into the river and floated down the stream, the ties being buoyant enough to hold up the rails. Along with the track went picks and tools still stuck in the ties where the workmen had left them in a frantic dash for safe ground when the banks began caving in. The sight of a railroad being carried on the surface of the Colorado river was quite a novel one.

J. S. Withers, representative of Kingman lodge No. 468, B. P. O. Elks, returned from Los Angeles last Tuesday, where he attended the late session of the grand lodge. He is very enthusiastic over the treatment received by the visitors in the Angel City and the pomp and pageantry displayed in the floats and parades of the fraternal and civic bodies during the session. He is of the opinion that Grand Exalted Ruler Sammis will make the best Ruler the order has ever had. Judge L. M. Teale returned with Mr. Withers, and is another of the enthusiasts from the Angel City.

Some time ago the report was current in Kingman that Indians had killed an old prospector, in the Wallapai mountains, first burying the body and later burning up everything of an incriminating nature. The man was supposed to be J. J. Watt, who mined and prospected in the Music mountain range many years. William Grant, the Hackberry merchant, this week received a letter from B. F. Watts, of Marshall, Oklahoma, conveying the information that J. J. Watts died at Lander, Wyoming, last winter. The man who was killed by the Indians is believed to be a stranger that came to Kingman and was lured to the mountains by the Indians by a story of a lost mine that they had found in that section. The man was killed by Willetopsy and his sons, so it is reported by the other Indians.

## Commercial Organization.

Last Sunday, the committee recently appointed to prepare rules, regulations and bylaws for the new commercial organization, which is soon to be launched in this county, met at the offices of Dr. J. R. Whiteside and prepared and adopted laws and rules to govern the organization. These laws and rules will be submitted to the general meeting, which has been called for next Wednesday evening, at Elks Hall. The question of naming the organization has been left to the meeting next week, when something will be adopted that will fill the bill. Everybody should attend the meeting and get their names on the roster of what, we expect, will be one of the most up-to-date boosting organizations the county has ever had. Miners, mine owners, commercial men and everybody interested in the welfare of Mohave county should have their names on the list of this organization. Remember the date, Wednesday, July 28.

A. F. Harris and family returned to Kingman last Monday evening from Los Angeles.

Mrs. Lilly Payne, daughter of Mr. and Mrs. James Dundon, departed Monday last to her home in Waco, Texas, having spent several months in this county visiting with relatives.

J. P. Gideon and bride returned from Los Angeles last Monday night and have been receiving the congratulations of their many friends. They will soon begin housekeeping and will reside in Kingman.

John F. Withers and I. D. Hilty returned Sunday last from Los Angeles. Mr. Hilty took a course at the hot springs of southern California for a case of deep seated rheumatism.

George H. Taylor, while putting in a telephone line to the Red Top mines, last Wednesday, was struck in the eye by the end of a wire, the eye being badly injured. He came to town Thursday and departed the same day to Los Angeles to consult a specialist.

Mrs. J. N. Wilson, who was taken to Los Angeles about a month ago for treatment at one of the hospitals, will soon return home, no benefit having been obtained. Mrs. Wilson has been a sufferer from rheumatism the past five or six years and everything possible has been done by her relatives to alleviate her suffering, but without avail.

Lovin & Withers are building an immense stable for the Kingman Livery Stable of M. G. Wagner. It seems too bad, now that everybody is building fireproof structures that a great wooden building should be thrust up in the main business part of the town to be a menace for years to come. We hope the owners will see their error and build a stone or concrete structure as soon as possible.

Owing to a rate war between the Southern Pacific and Santa Fe the rate on cyanide has been reduced from 3.17\$ per one hundred pounds to 2.77\$ per one hundred pounds to Goldfield and other common points in Nevada. The Santa Fe receives the cyanide from Europe by way of Salina Cruz and San Diego. The big mills of Goldfield use from six to seven carloads of cyanide every month and the road bringing it in the cheapest usually gets all the freights of the mining companies.

The Santa Fe is having a hard time trying to save its pump station at Topock. The Colorado river has cut out the banks more than a quarter of a mile on the Arizona side, and the pump station had to be moved farther inland. Every effort is being made to prevent the further encroachment of the river, but so far without avail. The big concrete banks on the California side of the river is forcing the stream straight across against the banks on the Arizona side, making a big whirlpool that is fast demolishing the banks along the main line of the railroad. It is estimated that the river is more than forty feet deep where a month ago there was high land.

The following letters remain uncalled for in the Kingman postoffice: Mrs. L. M. Berry, Mrs. L. V. Becker, Ethel Bruener, Fred Baca, Feodolo Perez 2, C. E. Bien, Bernie Pica, Lorenzo V. Ramirez, Geo. Wolverson, Amana Marling, Jno. Morris, Jas. Lewis, W. H. Kipp, Jas. King, Thomas Carter, John Beckman, Thos. Anderson.

## In Memoriam.

Whereas, God, in his infinite wisdom, has taken out of this world the soul of our dear sister, Launee Crozier Hunt, who died at Albuquerque, New Mexico, on July 9th, 1909, therefore, it is resolved, that in the death of Mrs. Hunt this lodge has lost one of its best and dearest members, and the community in which she lived a most worthy member of society. To her sorrowing husband, mother, sisters and relatives the condolence of Rebekah lodge is extended. May they be strengthened to bear their loss with fortitude and may the little one, left behind by its loving mother, be ever a comfort to them throughout their lives.

KINGMAN REBEKAH LODGE NO. 12.  
NETTIE FANCHER,  
MAY DAVIS,  
Committee.  
Kingman, Arizona, July 17, 1909.

Developments in the Little Daisy mine owned by the United Verde Extension Mining Company and located immediately east of the United Verde mines are very encouraging lately. A large body of low grade ore has been opened by the crosscut which is still being pushed from the 800 foot level in the direction of the hanging wall. In this large body of low grade ore are several lenses of higher grade ranging in thickness from three to seven feet.—Prescott Courier.

The Santa Fe railroad company is making a preliminary survey for a new sewer from the water tanks to a point below the dam in Railroad Canyon. This new sewer system will carry away all the waste water and compounds used in the treatment tanks, besides sewage from the depot, Harvey House and other houses of the company. It will be large enough to meet all demands for years to come.

Tucson interests are planning the purchase of 6,000 acres of land in Pima county, to be apportioned into sections and sold at a reasonable figure to homeseekers. In connection with the big land deal, if it is put through, will be the execution of the biggest irrigation project in that section of the territory.

Maricopa, with the total assessed wealth of over 16,000,000\$, has but one producing mine within its borders. This is disclosed in the report of County Assessor Luke to the board of supervisors, and is shown to be the Relief mine.—Phoenix Democrat.

The Ray Consolidated company is laying out a new townsite on the flat about one-half mile north of the present townsite. It is an ideal location for a townsite, and will afford plenty of room for buildings, as the flat is a large one.—Arizona Blade.

The little child of Mr. and Mrs. Francis Clark, who was so severely wounded by being shot in the side with a shotgun in the hands of his little brother, is fast recovering and may not be crippled by the injury.

Small pox has broken out at Mesa and the health board is doing everything in its power to stop the spread of the disease.

Stanford University, California, is to have a department of mines.

**Bowel Complaint in Children.**  
When six months old the little daughter of E. N. Dewey, a well known merchant of Agnewville, Va., had an attack of cholera infantum. Chamberlain's Colic, Cholera and Diarrhoea Remedy was given and effected a complete cure. This remedy has proven very successful in cases of bowel complaint in children and when given according to the plan printed directions can be relied upon with perfect confidence. When reduced with water and sweetened it is pleasant to take, which is of great importance when a medicine must be given to young children. For sale by H. H. Watkins.

Anyone desiring steno-graphic work done will please leave word at this office.

**Mine Warning Notice.**  
To Whom It May Concern:  
Notice is hereby given that the Prosperity mine, situated in the Wallapai mining district, Mohave County, Arizona, is under lease and bond to parties working the same, and that neither the mine nor the owner thereof will be responsible for any labor or debt contracted, nor injuries sustained by any employer or employee in working said property, and that no employer or employee is the agent of the owner for any purpose, and that all operatives engaged in such service at their own risk, and that no debt or claim of debt is valid against said mining claim or its owner.  
OWEN MCNEELY,  
Todd Basin, Arizona, June 3, 1909.

The Prescott Dredge Company yesterday began the extensive prospecting of their ground on Lynx creek. They will convey a pipe line to the upper elevation near the creek beds to determine the exact nature of the ground at that point. They will sluice the gravel, and believe it will yield handsomely, there being every indication that it is attractive.—Journal-Miner.

## Copper Mines for Sale.

—We have a group of Copper Mines, in Cedar Valley Mining District that show wonderful values in copper. The veins are large and well-defined, being cut at right angles by deep and abrupt canyons. There are nine claims in the group, each claim covering from one to four veins. Ideally situated. Will sell for cash, or, long working bond. All communications to
